

This statewide graph compares the sum of total volume counts from all the continuous count sites contained within this report to the comparable historical traffic, for the identified dates. This uses data from all directions using a sample of both urban and rural sites. Individual TTMS sites observe either greater, or lesser, change in travel behavior, depending on the location. Historical Daily Traffic Volume data was developed using a 5-year (2015-2019) median for that specific day (Su, M, T, W, Th, F, Sa) using the months of March/April & May/June, used respectively for the days within each month.
